# We are in the kitchen of the business.

In the kitchen, flavor mixes with love, unique tastes mix with love and there emerges the best dishes of the world.

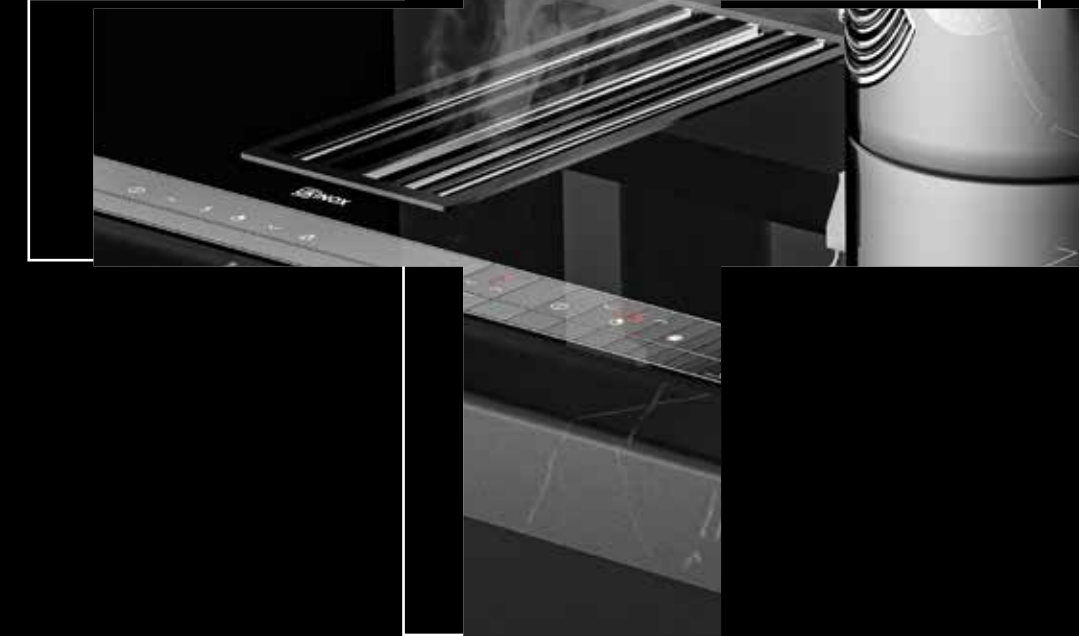

As Ukinox, we offer our customers a piece of happiness, the aura of the modern kitchen; and we maintain our leadership as a leading kitchen sink and home appliance solution and service provider with our passion to change the world.

Our journey that started in Turkey continues with international production standards in our “joint venture” factories in 6 countries. At the same time, with our offices in England, Germany, Canada and America, we are on the way to become a well-known brand all over the world.

**UKINOX**

We keep the pulse of the sector by producing with our experience in our factories in six different countries of the world by using new technology machines, particularly in Düzce.

We can produce all kinds of sinks in all sizes, especially in our Düzce factory, which is operated with Industry 4.0. We are crowning our efforts and determination by exporting to 80 different countries of the world. We have been in the American market for 16 years, as well as Asian countries such as Canada, Russia, Ukraine, all European countries, China, New Zealand. Every year, we achieve 100% growth over the sector growth figures in Turkey and around the world.

We are proud to announce the name of Turkey to the world with our different designs, our approach that attaches importance to R&D, our patented products and our vision targeting the future.

85% of our  
production is  
for exports

As a well-known Turkish brand in the world, we also made a strong entry into the Turkish market. In a short time, we started to compete with the brands that are the market leaders with customer satisfaction. We are growing our organization day by day with our dealership network and strong service channels that we have established throughout Turkey. With our more than 300 dealers and our logistics success, we make timely deliveries.

**UKINOX**

# We are focused on people

We are proud of growing our success with the same beliefs and values on this road that we started 27 years ago.

We continue to work professionally but with an amateur spirit and passion by transferring our philosophy to generations without compromising sustainability in the production and management process.

**We prioritize respect in every step we take; in this direction, we work by consuming the world's resources in the least possible way in order to add value to people, nature and our world.**

Our products, which we designed based on the necessity of understanding people and knowing what their needs are; We design products that are functional, responding to changing emotions and habits, by closely following economic, cultural and social changes.

We care about our customers with our people-oriented approach, and we continue to produce products that will ensure the least and efficient use of resources with permanent solutions in order to make the world we live in a better place.

By making the necessary investments for sustainability with our knowledge and experience, we share this awareness with our suppliers and collaborators as well as our employees. We act with environmental and life awareness at every stage from procurement to production, from packaging to delivery.

A high-angle, close-up photograph of a black UKINOX induction cooktop. The cooktop is set into a dark, textured countertop. The central burner is illuminated with a bright red, concentric circular glow, indicating it is powered on. Four other burners are visible, each marked with a white dotted line. The UKINOX logo is printed in white in the top-left corner and bottom-right corner of the cooktop's surface. A control panel is located at the bottom edge, featuring several red and white touch-sensitive buttons and a small digital display showing '88'.

**UKINOX**

# High Efficiency with Innovative Induction Technology

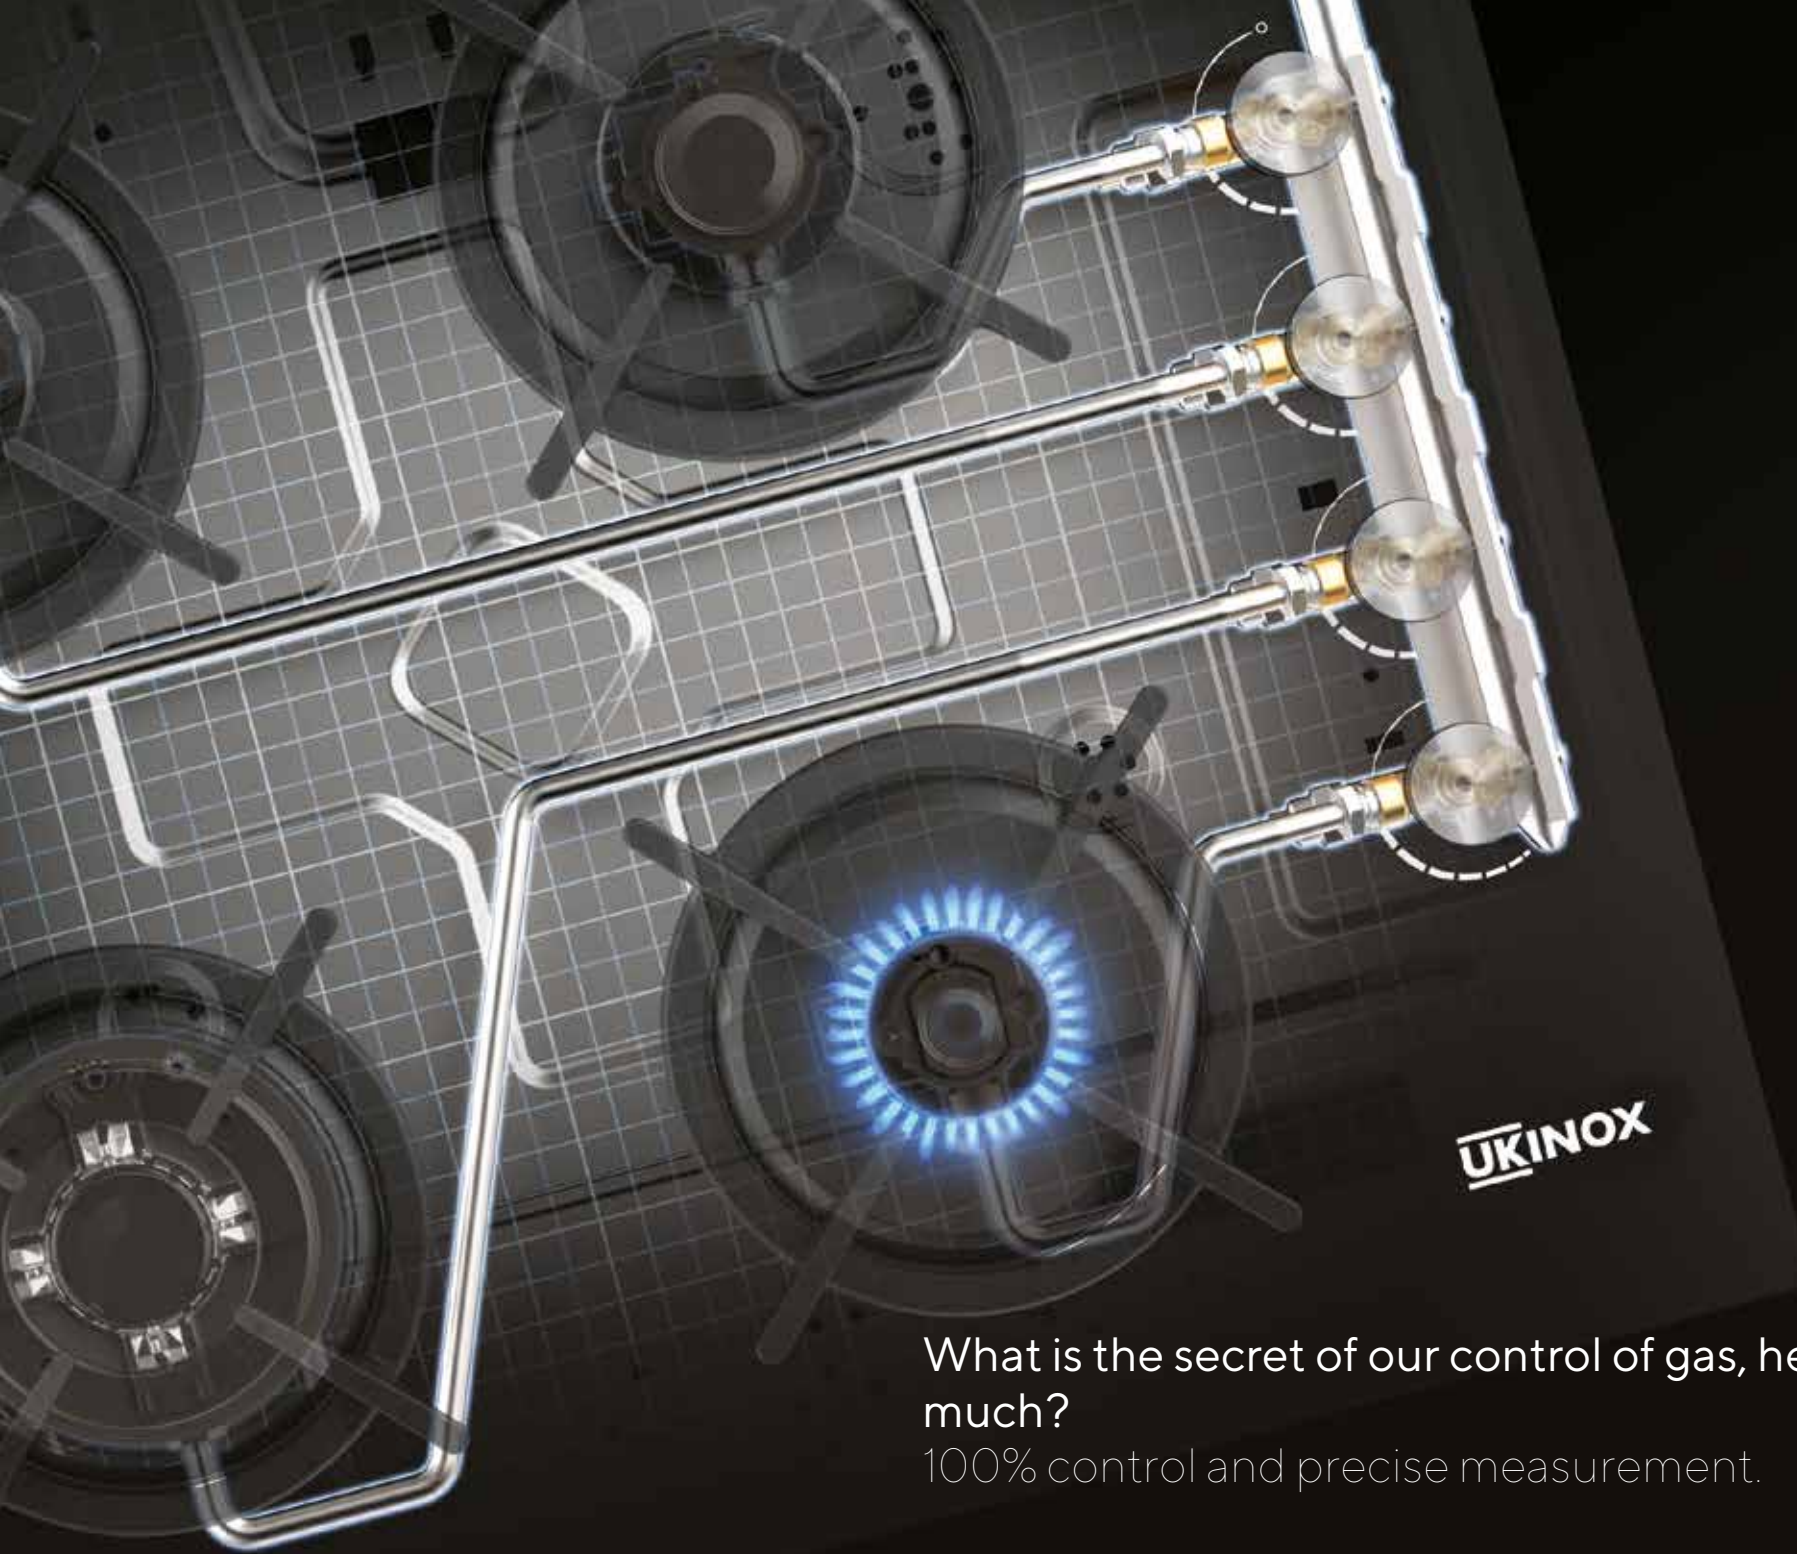

## **Cookers**

Besides our wide range of cookers; based on the principle of electromagnetic induction; We offer induction cook tops using renewable energy sources, which are useful with high-end technology, stylish appearance, low energy consumption, easy cleaning and cooking food much faster without emitting heat.

With our induction hobs that we produce, we consider not only functionality but also safety and social benefit. Our induction cooktops provide twice the economic savings of gas with 94.6% energy efficiency.

What is the secret of our control of gas, heat and air so much?  
100% control and precise measurement.

**UKINOX**

#### VITRO CERAMIC COOKERS

Since it is a flat area, it makes the cleaning process very easy. It allows to adjust the function and power levels with the touch control panel.

#### HEAT RESISTANT GLASS SURFACE

Glass surface with a special heat treatment (tempering) that can withstand temperatures of 450 degrees.

#### BISOTEL GLASS SURFACE

Bizote Statement; Specifies the cut made from an angle less than 90 degrees. A bevelled edge is typically used to create a decorative style and has no functional purpose. Glass is available.

#### BURNING BLUE BLUE

Highly energy-saving combustibles.

#### AUTO IGNITION

Do not burn with one hand. Press and turn the ergonomically designed control buttons, the burner will light up automatically.

#### WOK STAND

Cast grilles are both stylish and highly durable. While adding a strong and modern look to your kitchen, it also provides real and durable support for your cooking pans.

#### WOK BEK

WOK burners are designed to improve heat dissipation. Thus, stronger firepower is provided in a shorter time. It can be used for dishes cooked in a large pot. It is also ideal for the preparation of Far Eastern cuisine dishes.

#### AUTOMATIC THROTTLE

It is a safety system that automatically cuts off the gas in case the flame goes out for any reason while the stove is burning.

#### ERGONOMIC BUTTON

It is possible to find the best and different designs covered with inox and bakelite. They are not affected by heat.

#### CASTING GRILLES

The new cast gratings are safer and more stable. It can also be easily dislodged allowing quick cleaning from the glass face.

## PERFORMANCE 65 XRS BLACK GLASS

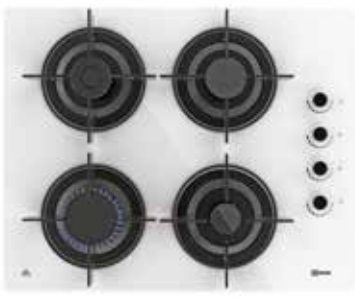

- 65 cm Gas Glass Cooker with 4 Burners
- 2.5 kW Wok Combustible Eye
- 1 Normal MORNING Flammable Eye
- 1 Economic Combustible Eye
- Dishwasher Safe Round Enamel Grid
- Button Controlled Automatic Ignition
- Ergonomic Metal Look Button
- Italian Gas Safety System
- Gas Saving Italian Combustibles
- High Temperature Resistant Black Glass
- Smart Flame False Feature

- Touch sensor technologies: capacitive, infrared
- Visualization types: 7-segment and LED based displays
- Colours: red by default, others available upon request
- Acoustic feedback: buzzer
- Power selection/visualization: up to 10 / 20 levels
- Heater interface/selection: shared/independent +/-; shared/independent slider
- Control up to 5 heaters and 8 heating zones

- Pause function (Stop&Go, Play-Pause)
- Power 'P', booster 'B', Heat-up 'A'
- Pre-dened cooking functions (simmering, melting, boiling, keep warm, low temp., slow cooking, etc.) or any other xed time and power setup
- Remember function: memorize and reproduce
- Extensions (double/triple zones); shared/direct access keys
- Bridge: linked heaters

- Power limitation (eco mode): x ed / congrable
- SETTINGS mode
- ASS (aftersales) mode
- DEMO mode
- Auto-congrable models
- Communication with other appliances or devices (<hood, flow-in, smartphones, ...)
- Master-slave touch connection

- Optional timer function
- Selectable timer from 0 to 99 minutes
- Individual timer per heater, also minute minder available
- Visualization: independent/shared, dedicated/hidden
- Heater switch off or minute minder (only alarm)

- General/ independent on/off
- Key lock (child lock)
- Pot presence indication
- Protection from accidental activation of keys (liquids pill, overflow)
- Residual heat indication
- Automatic safety switch off
- Overheating thermal protection
- Internal self-checking
